Abstract of US 2006202530 (A1)
[Translate this text](#)

A reclining apparatus is disclosed for a **chair** that includes a backrest and a seat. The reclining apparatus includes a frame and a linkage installed on the frame in order to support the backrest pivotally and the seat movably so that the seat is kept substantially horizontal when the backrest is reclined.

The technical drawing shows a side view of a chair with a reclining mechanism. The chair has a five-point base with casters. The seat is connected to a frame via a linkage system that allows the seat to remain horizontal while the backrest reclines. Various components are labeled with reference numerals: 10, 11, 12, 13, 14, 15, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62.
